WEST MIDLANDS, UNITED KINGDOM – January 12, 2003 – To celebrate the launch of EasyCatalog Pro for InDesign 2.0.2, 65bit Software today released a free plug-in, ‘MultiDo’.

MultiDo allows InDesign 2.0.2 users to undo or redo multiple steps in one operation – the last 100 operations are shown on a new menu on the InDesign ‘Edit’ menu.

“We wanted to celebrate the launch of our flagship product, EasyCatalog Pro, by giving away a free plug-in, which we hope InDesign users will find useful,” said Ian White, Director of 65bit Software Ltd.

EasyCatalog Pro is 65bit Software’s database publishing solution, offering integration with a wide range of data sources and unrivalled plug-in features. EasyCatalog Pro is currently available for evaluation from the 65bit Software website.

MultiDo is available immediately as a free download from the 65bit Software website, www.65bit.com.

About 65bit Software

65bit Software Limited was founded in 2003 and specializes in the development of high quality Plug-ins for Adobe InDesign and InCopy.

The growing processing power of today’s desktop computers is allowing the development of a new breed of tools, offering levels of integration, power and ease of use previously only seen in high end publishing systems.

At 65bit we are committed to providing best of breed solutions for the database publishing, catalog, newspaper and magazine markets.
