WEST MIDLANDS, UNITED KINGDOM – July 12, 2004 -- 65bit Software today announced the availability of the first public beta version of EasyHistoryCS for Adobe InDesign CS.

Available immediately for download from www.65bit.com, EasyHistoryCS brings a history panel to InDesign CS.

The EasyHistoryCS panel shows the available undo and redo steps - simply double click to undo or redo multiple steps. The panel also shows a snapshot of the current spread when the document is saved, or when the user hits the snapshot button.

“Following on from the tremendous popularity of MultiDo, our free history plug-in for InDesign CS, we received many requests for a history panel. A beta version is currently available for download and evaluation - as a thank you for trying out this early version, the plug-in can be purchased for half normal retail price until July 31,” said Ian White, Director of 65bit Software Ltd.

EasyHistoryCS is available immediately for InDesign CS on Macintosh and Windows, and a free 15 minute evaluation version is available on the 65bit website, www.65bit.com.
