WEST MIDLANDS, UNITED KINGDOM - January 21, 2005 -- 65bit Software today announced the availability of the latest version of EasyCatalogCS for Adobe InDesign CS

Available immediately for download from www.65bit.com, EasyCatalogCS is now available with two additional modules:

Pagination

The new pagination module allows users to paginate many hundreds of records at the click of a button.

Scripting

Power users can now control EasyCatalogCS using Javascript, AppleScript (on the Macintosh) and Visual Basic (on Windows).

“We were thrilled with the response to EasyCatalogCS during 2004,” said Ian White, Director of 65bit Software Ltd. “EasyCatalogCS quickly established itself as one of the leading Database Publishing solutions for Adobe InDesign - so much so, that it is now used in over fifteen countries across three continents.”

“We recognize that some users want to automate their workflow even further than EasyCatalogCS allowed - therefore, we decided to create two additional modules. Users can now either use the pagination facilities provided by the Pagination Module, or create their own solutions using Scripting.”

Existing users will be given a free upgrade to Pagination module.

EasyCatalogCS 1.1 Launched

EasyCatalogCS is available immediately for InDesign CS on Macintosh and Windows, and a free 15 day evaluation version is available on the 65bit website, www.65bit.com.

About 65bit Software

65bit Software Limited was founded in 2003 and specializes in the development of high quality Plug-ins for Adobe InDesign and InCopy.

The growing processing power of today's desktop computers is allowing the development of a new breed of tools, offering levels of integration, power and ease of use previously only seen in high end publishing systems.

At 65bit we are committed to providing best of breed solutions for the database publishing, catalog, newspaper and magazine markets.

For more information, contact Mark Haden, Director, at 65bit Software.
